

**W1**

# Spring Clip

**Zinc-plated mild steel**

## Spring Clip **AML W1**

| <b>Information</b>   | <b>Nominal diameter Ø</b> | <b>Reference W1</b> | <b>Ø di</b>          | <b>b</b> | <b>a ± 0,05</b> | <b>s</b> | <b>Box Quantity</b> | <b>Packing</b> |
|--|---------------------------|---------------------|----------------------|----------|-----------------|----------|---------------------|----------------|
| Spring clips are designed to distribute pressure uniformly around the application zone. Their use is recommended when the hose is subject to rapid changes in temperature which cause expansion and contraction of the materials used in the assembly. The spring clip maintains pressure during this process, thereby preventing leaks. | 6                         | 02014025            | 5,5 <sup>±0,1</sup>  | 7        | 3               | 0,5      | 500                 | 8000           |
