

INNOVATIVE
LIGHTING inc.[®]

Inc. 500

In 2002, 2003 and again in 2004, Innovative Lighting has been named by INC. Magazine as one of the nation's top 500 fastest growing companies.

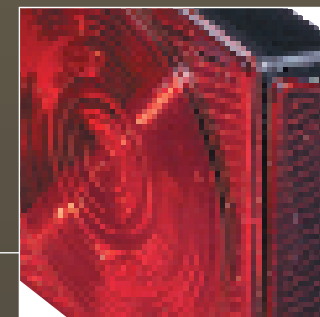

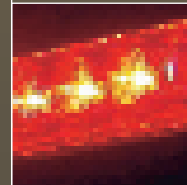

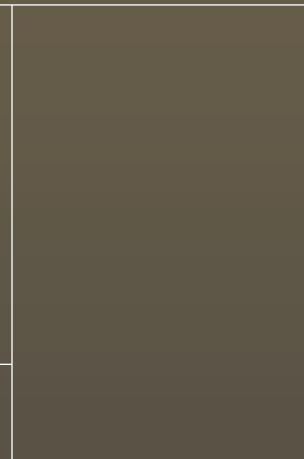

Jerry Handsaker, President of Innovative Lighting Inc. received the 2004 Iowa / Nebraska Region Ernst & Young Entrepreneur Of The Year® award. More than 3,000 people across the United States are nominated annually for the prestigious Ernst & Young awards program. Of these nominees, approximately 350 are honored as outstanding entrepreneurs. Handsaker said, "This award reflects on the outstanding effort made by each and every employee of Innovative Lighting."

Innovative Lighting received the Innovation Award for their new battery-operated Hand Held Signaling Horn. They received this award during the 2003 MAATS show held in July in Las Vegas, NV. This award was presented by the National Marine Manufacturers Association.

The 2003 Boatkeeper Award was presented by the Editor-in-Chief of MotorBoating Magazine to Innovative Lighting for their Hand Held Signaling Horn. This award is given for the most functional gear and accessories designed to make the boat owner's life easier.

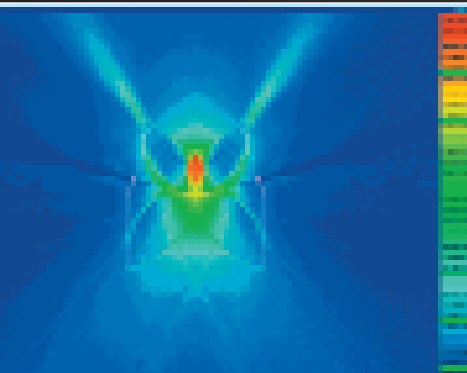

COMMITMENT TO EXCELLENCE

It is our conviction that to be the best is not sufficient for that is only a comparison to the standards of others.

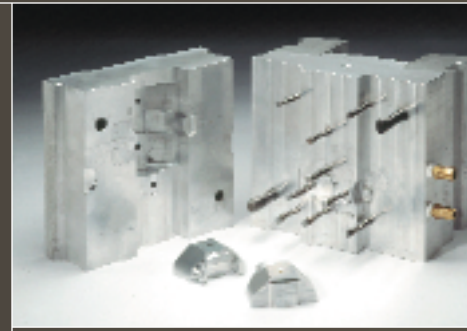

MISSION STATEMENT

To produce innovative, value intensive products by cultivating the creativity and capabilities of dedicated employees who support the common goal of creating and maintaining satisfied customers.

Lens Optimization

Innovative Lighting develops and designs energy efficient, cost effective lighting products. Using sophisticated lens software, we collect, measure, and redistribute the light energy (source) to a calculated surface. Our virtual modeling system optimizes the lens design so the light output loses the least amount of light energy assuring an accurate and reliable optical system.

Proto-Type Molds

Innovative Lighting can produce cost effective and accurate prototype molds machined to manufacture plastic components from any specified thermoplastic material. This service is ideal for producing high-quality, low volume parts that do not warrant expensive hardened tool steel dies.

CAD / Design Services

Innovative Lighting utilizes the latest computer aided engineering software, including ProE, Solid Works, Trace Pro, Mold Flow, and TFCalc, to create three-dimensional (3-D) solid databases enhanced by Innovative's own optical software for lens optimization. This database allows for modifications and designs that are tailored to meet customer and industry specifications.

Injection Molding Services

Innovative Lighting manufactures and produces precise, high quality molded components from our state-of-the-art electric and hydraulic presses that meet and exceed customer expectations.

Rapid Proto-Typing

Innovative Lighting uses the latest in technology to produce 3-D Selective Laser Sintering (SLS) prototypes from computer generated databases. Innovative, as well as our customers, may compress development time, reduce tooling costs, refine and test functional SLS parts into a matter of days. Innovative provides a high speed Internet link with secure FTP sites to accept database files in STL, Iges, and ProE formats.

Multiple materials can be used to satisfy customer specific requirements including...

- Duraform (Nylon)
- Somos (Flexible Elastomer)
- Glass-filled Duraform
- Castform (Polystyrene / Wax)

Precision Assembly

Innovative Lighting performs all of its assembly processes in a controlled environment to assure proper set-up and curing time. Components are designed, measured, and monitored to meet our stringent specifications.

Distribution / Packaging

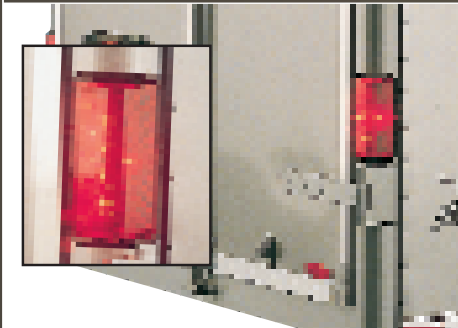

Innovative Lighting carries a complete finished goods inventory in bulk and point-of-purchase retail packaging. Our products are sold worldwide through a select network of professional independent sales representatives and distributors.

Proto-Type Finishing

Innovative Lighting produces fully finished prototypes useful for your engineering, marketing or testing requirements.

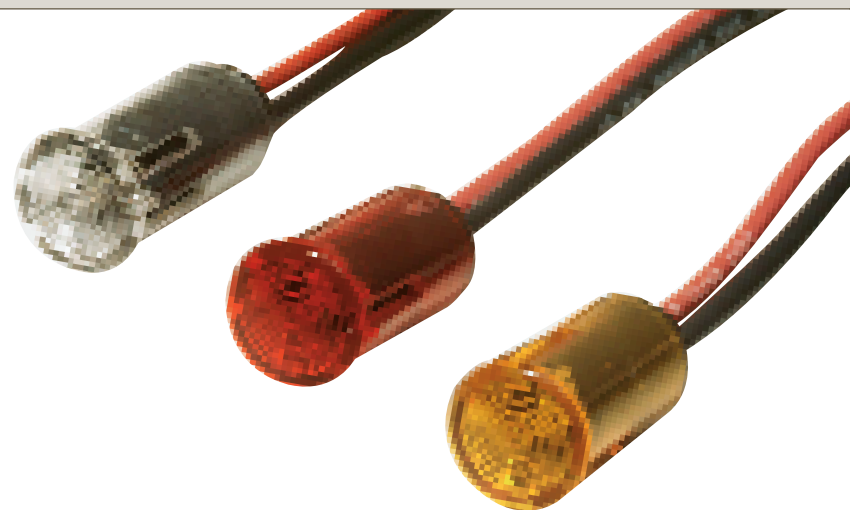

Innovative can create a high profile prototype that appears completely finished, commercial ready, and fully functional.

Proprietary Custom LED Applications

Innovative Lighting offers complete engineering assistance in designing, prototyping and manufacturing proprietary LED lighting applications in accordance with DOT/SAE and FMVSS 108 standards. All safety LED lighting products are independently third party certified.

Light Emitting Diode, more commonly known as "LED", represents the cutting edge of lighting technology. LEDs operate on a totally different concept than traditional incandescent style lights. Instead of using a brittle metal filament that is susceptible to shock and vibration, LEDs are solid-state devices with no moving parts utilizing an electronic chip that is encapsulated in an epoxy substrate. This design provides increased durability and a protective seal against outside or foreign elements.

Efficiency

LED's are very energy efficient and consume less power (amp draw)...up to 90% less power than incandescent bulbs. This reduces the load on your electrical system including your battery, alternator, and power converter resulting in direct money-saving benefits.

No Heat

LED lights generate no heat therefore they are cool to the touch and can be left on for hours without incident or consequence if touched.

Longevity

LEDs are rated for 100,000 hours compared to 3,000 hours for incandescent bulbs. Consider real world circumstances where most incandescent bulbs need to be replaced within one year. An LED light will last over 20 years before needing a replacement.

Fusing

Due to the low energy draw of LEDs, the gauge of wire used can be reduced. **CAUTION: Typical incandescent fusing requirements are too robust for LEDs and therefore, fusing must be sized for the low LED circuit draw. Incorrect fuse sizing can cause damage to your electrical system.** Innovative's Electronic Engineering Staff can assist you when sizing your fuse requirements.

Future

LEDs are vastly becoming the preferred low voltage lighting resource versus incandescent lighting. New and brighter LEDs are under development and will impact your future lighting requirements.

Innovative Lighting is recognized as a leading design and manufacturing company specializing in quality LED lighting applications and solutions.

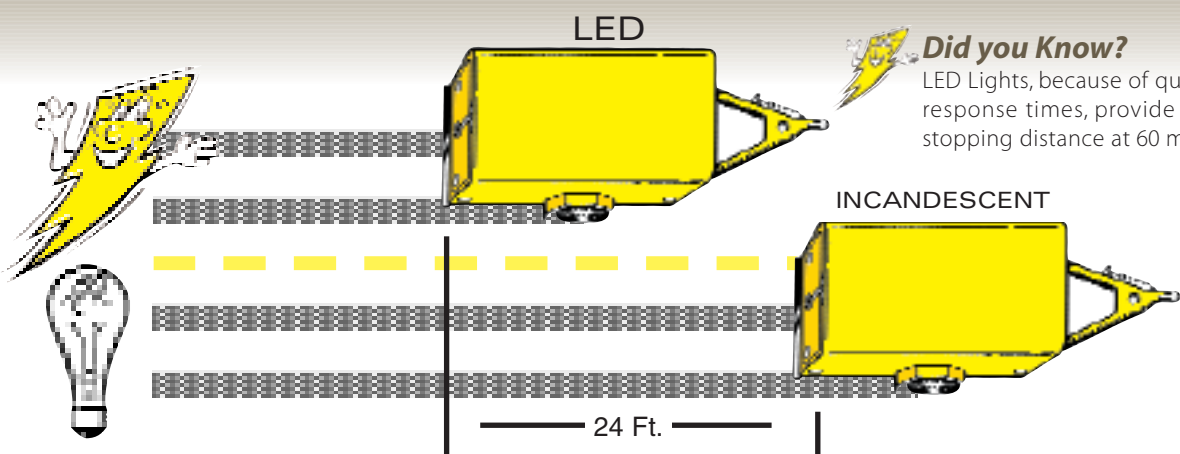

Take advantage of the many benefits of LED lighting and the proven experience of Innovative Lighting.

Know Your A<B<Cs

LED's are measured by an "alpha number", also known as, a "bin" number. For example A,B,C, etc... the higher the alpha or bin number, the higher the intensity. The color of light and consistency of light varies with manufacturers. Innovative Lighting uses only approved manufacturers meeting our stringent design and quality specifications.

SAFETY

Improved safety may be LED's most important benefit, as they provide instantaneous and brighter illumination compared to incandescent bulbs that require more burn time when illuminated.

Did you Know?

LED Lights, because of quicker and brighter response times, provide an extra 24 feet of stopping distance at 60 miles per hour.

Single LED Accent Surface Mount Lights

- Operates 9-16 Volt DC Systems
- 24 Volt Version Available
- Size: 1.57" L x .82" W x .57" D
- Rated @ 200,000 Hours of Service Life
- Shock and Vibration Proof
- Cool to the Touch
- Energy Draw 26 Milliamps
- No Corrosion
- Potted to Seal Out Moisture
- 1 LED
- Patent #D443377

Optional rubber grommet

6" Oval LED Sidemarker / Clearance Light – Surface Mount

- Operates 9-16 Volt DC Systems
- 10 LED Configuration
- Size 7.50" L x 3.30" W x .85" D
- 100,000 Hours of Service Life
- Requires 1/2" (.50") Hole
- Sonically Sealed Polycarbonate Lens and Housing
- Shock and Vibration Proof
- Energy Draw 250 Milliamps
- Mounted Vertical, Horizontal, or 45 Degrees
- Impact Resistant

Optional TK Plug Connector

ALL-ROUND LED STERN LIGHTS

- Operates 12 Volt DC Systems
- For Powerboats Under 20 Meters (65.6 Ft.)
- Single LED Configuration
- 50,000 Hours LED Service Life
- Uses 3 Watts of Energy
- Vibration/Shock Proof
- Sealed Circuitry
- Requires 1 3/4" (1.750") Hole
- Corrosion Resistant Construction
- Durable Stainless Steel Telescopic Pole
- Easily Installed on New and Used Boats
- No Change in Current Switch Required
- Certified Ignition Protected
- IMCI Certified for ISO #8846

Innovative Lighting's LED Navigation Lights are USCG Certified and NMMA Listed.

INNOVATIVE USES

- Boats**
- Lighted Docks**
- RV's**
- Lighted Decks**
- Lighted Walk-Ways**

Innovative Lighting offers attractive, eye-catching Point-of-Purchase (POP) retail clamshell packaging to better serve our aftermarket network.

LED (Light Emitting Diode) Limited Lifetime Warranty:

Innovative Lighting Corporation (ILC) extends a Limited Lifetime LED Lamp Warranty to the original purchaser that ILC's sealed LED Lamp is free from defects in workmanship and/or materials only. Any product developing such defect in material or workmanship within this period will be repaired or replaced with a like product, at our option (ILC) providing it is sent to us, transportation charges prepaid, along with US\$5.00 to cover the cost of handling. Please note; this is not a repair charge. Proof-of-Purchase date to ILC at our Roland, Iowa, factory must accompany return. ILC does not warrant any incandescent electric lamps (bulbs) free against defects and or performance.

The LED LIMITED LIFETIME WARRANTY DOES NOT APPLY TO SEVERE APPLICATIONS such as buses, construction equipment and off-road vehicles. These applications are examples only and are not all inclusive of each exclusive application. Many chemicals and /or cleaners are incompatible with ILC's LED products; therefore, the LED Limited Lifetime Lamp Warranty does not apply to damage associated with incompatible chemicals and cleaners. The ILC LED lamps are to remain intact, free from physical abuse, not subject to improper installation or modification. Any violation of these conditions will void this LED Limited Lifetime Lamp Warranty.

This LED Limited Lifetime Warranty is not transferable and applies to the original installation of the sealed LED lamps for as long as the original consumer/purchaser owns the vehicle/boat/trailer (LIFETIME).

One Year Limited Product Warranty:

ILC Limited Product Warranty is ONE (1) YEAR on all other components, including battery lights, extend-a-light and power light products, and trailer lighting products. Any product developing such defect in material or workmanship within this period will be repaired or replaced with a like product, at our option (ILC) providing it is sent to us, transportation charges prepaid, along with US\$5.00 to cover the cost of handling. Please note; this is not a repair charge. Proof-of-Purchase date to ILC at our Roland, Iowa, factory must accompany return. ILC does not warrant any incandescent electric lamps (bulbs) free against defects and or performance.

Chrome plated products showing evidence of peeling will be repaired or replaced at ILC's discretion. Chrome showing signs of wear due to debris, rock chips, pitting, etc... will not be covered.

This warranty is void if the product warranted has been damaged by accident or unreasonable use, neglect, improper service or other cause not arising out of defects in material or workmanship.

Five Year Limited Product Warranty:

ILC Limited Product Warranty is FIVE (5) YEARS on docking lights, horn related products and navigation lights (excluding extend-a-lights and powerlights) and their components. Any product developing such defect in material or workmanship within this period will be repaired or replaced with a like product, at our option (ILC) providing it is sent to us, transportation charges prepaid, along with US\$5.00 to cover the cost of handling. Please note; this is not a repair charge. Proof-of-Purchase date to ILC at our Roland, Iowa, factory must accompany return. ILC does not warrant any incandescent electric lamps (bulbs) free against defects and or performance.

This warranty is void if the product warranted has been damaged by accident or unreasonable use, neglect, improper service or other cause not arising out of defects in material or workmanship.
